

Show-Me School-Based Health Alliance Overview

Missouri Coalition for Oral Health
2020 Policy Conference

Show-Me School-Based Health Alliance of MO

Mission: We support communities in building and sustaining quality school-based health programs.

**Access to Resources &
Best Practices**

**Peer-to-Peer Networking
Across MO Programs**

Target Audience

School districts,
community
stakeholders, and the
healthcare providers
that serve them.

**Advocacy & Coalition
Building**

Technical Assistance

**Data Collection &
Evaluation**

Training & Education

Missouri SBH Program Type Definitions

THE BIG SIX

The Show-Me School-Based Health Alliance has expanded the types of school-based health programs to represent the six types of programs that exist in districts throughout Missouri.

1 2 3 4 5 6

① Comprehensive School-Based Health Center

Comprehensive School-Based Health Centers are a partnership between schools and community health organizations that deliver primary health care, behavioral/mental health care, oral care, and vision care coordinated by the center—even if they are delivered by different providers.

② School-Based Health Center

School-Based Health Center (SBHC) programs are partnerships between schools and community health organizations that deliver primary health care, at minimum, through a fixed site on a school campus.

③ School-Linked Health Care

School-Linked Health Care programs are linked with schools to coordinate and provide health care for students. Services are delivered off campus through a fixed site near the school.

④ School-Based Mental Health Program

School-based mental health programs are partnerships similar to SBHCs but only provide behavioral/mental health.

⑤ Mobile Health Care

Mobile Health Care programs are without a fixed site that rotate a health care team through a number of schools, including mobile van/bus/clinic on wheels that parks on or near school property/campus.

⑥ Telehealth

Telehealth programs deliver 100% of school-based health care services using telemedicine technology.

2019 Census of SBH Programs

- Data collected from September 2019 – early March 2020
 - **Rounds 1 & 2:** Asked district lead nurses whether and which schools have SBH programs, then asked identified school contacts who sponsors their SBH programs
 - **Round 3:** Asked sponsoring organizations about their SBH programs
- Primary goal is to describe the SBH program landscape in MO for Alliance members, policy makers, funders, and other key stakeholders
- Finalized report to be released in May/June 2020; data collection to continue as we discover more programs

2019 Census Preliminary Findings

There are 18 confirmed organizations providing school-based oral health services in MO. FQHCs and look-alikes are the most common organization type.

Finalized report anticipated May/June 2020.

137,092 students
enrolled in 370 schools
across 98 districts
have access to oral health services
in a school setting.

2019 Census Preliminary Findings

The vast majority of organizations provide oral health services via mobile units (N=18).

2019 Census Preliminary Findings

Of the organizations that reported specific types of oral health services provided, all provide screenings and examinations (N=14).

Finalized report anticipated May/June 2020.
